

Crematory Operator's Certification Program (COCP)

"Advanced Crematory Operations"- Professional

Course Overview

The Advanced Crematory Operations course is designed for experienced crematory operators as well as managers and owners who are looking for training beyond that provided in a basic COCP. Topics include Ethics & Professionalism in the Crematory, Advanced Operating Techniques, Cremation Liabilities and a professionally prepared series of operational videos entitled *"You Make the Call"* that challenges the critical thinking of the attendees.

This 8 hour educational course will provide attendees with the information and knowledge to improve operating efficiencies, minimize pollution and nuisance problems, and promote better awareness of potential hazards in the crematorium as well as liability issues to help protect crematory personnel and business assets alike.
